

Coding & Solution

Date	28 September 2026
Team ID	SWTID-2026-4103
Project Name	FAQ Assistant API
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/24bsccs26-tech/AI-FAQ-Assistant-API
Programming Language(s)	Python
Framework(s) Used	[e.g., Flask, React, Spring Boot]

Key Features Implemented	AI-powered FAQ answering, natural language question processing, Gemini AI integration, JSON request and response, API communication, error/validation handling
Pending / Incomplete Features	Voice-based interaction, multilingual support, chat history, database integration, admin dashboard, user feedback, authentication, analytics dashboard
Setup / Run Instructions	Install Python → Install dependencies using pip install -r requirements.txt → Configure Gemini API credentials → Run the API using uvicorn main:app --reload → Test the /ask endpoint using Thunder Client

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:
